

HOST DHANRAJ

DIGITAL SOLUTIONS & CREATIVE INNOVATION

FRONTEND DEVELOPMENT INTERNSHIP

Frontend Developer

A 4-Week Professional Internship Presentation Report

INTERNSHIP DURATION

12 July - 13 August 2026 (4 Weeks)

STUDENT CREDENTIALS

Akshat Raj

Enrollment / Roll No.

25SCS1003001428

Program & Semester

B.Tech (CSE)

HOST ORGANIZATION

Host Dhanraj

Digital Solutions & Creative Innovation

Candidate & Program Overview

Candidate Details

Student Name: Akshat Raj

Roll Number: 25SCS1003001428

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2025 - 2029

University: IILM University, Greater Noida, U.P.

Internship Profile

Program Name: Host Dhanraj Internship Program

Specialization Domain: Frontend Developer

Duration: 4 Weeks (12 July - 13 August 2026)

Certificate ID: HDJ-JUL0725-198

Issued On: 12 August 2026

Organization Profile: Host Dhanraj

Host Dhanraj is a digital solutions and creative innovation studio operating under the motto "Learn. Build. Deploy. Impact."

- **Web & Product Engineering:** Delivers responsive, production-grade web interfaces for client and internal digital products.
- **Industry Mentorship:** Pairs interns with practicing developers to bridge classroom knowledge and real project delivery.
- **Core Focus Domains:** UI/UX Design, Frontend Engineering, AI-assisted Development, and Digital Product Innovation.

Problem Statement & Industry Context

The Industry Challenge

Academic courses teach HTML, CSS and JavaScript fundamentals, but students rarely get hands-on exposure to building interfaces that are responsive, accessible, performant, and production-ready. A visually correct page in isolation often breaks under real browsers, real data, and real users.

The Solution Scope

This internship covers the full frontend delivery lifecycle: UI/UX implementation, responsive layout, AI-assisted feature building, performance tuning, QA & debugging, and agile team collaboration - turning static designs into deployable, reliable web experiences.

Core Project Objectives

UI/UX Implementation

Translated design mockups into pixel-accurate, accessible interfaces using semantic HTML and modern CSS.

Responsive Web Development

Built layouts with Flexbox/Grid that adapt cleanly across mobile, tablet, and desktop breakpoints.

Performance Optimization

Improved load times and rendering efficiency through asset optimization and lazy loading techniques.

Quality Assurance & Debugging

Tested across browsers/devices and resolved defects using DevTools and structured debugging workflows.

Technologies & Frontend Toolchain

Markup & Styling

Languages: HTML5, CSS3
(Flexbox, Grid)

Scripting: JavaScript (ES6+)

Frameworks & UI

Library: React.js

Styling System: Tailwind CSS

Tooling & Workflow

Version Control: Git & GitHub

Build Tools: npm, Vite

Testing & QA

Debugging: Chrome DevTools

Validation: Cross-browser &
responsive testing

Production Frontend Workflow

Design Layer:

Figma / design mockups define the visual and interaction spec.

Build Layer:

Component-based UI built with HTML, CSS, JavaScript and React.

Integration Layer:

AI features and APIs wired into the interface for dynamic behavior.

QA Layer:

Cross-browser, responsive, and functional testing before release.

Deployment Layer:

Optimized build shipped and monitored for performance and stability.

Curriculum Timeline (Week 1 to 4)

Week 1

Foundations & UI Implementation

HTML/CSS/JS refresh, wireframe-to-UI translation, semantic markup.

Week 3

AI Integration & Performance

Wiring AI-assisted features, load-time and rendering optimization.

Week 2

Responsive Web Development

Flexbox/Grid layouts, mobile-first design, cross-device testing.

Week 4

Agile QA & Capstone

Sprint-based collaboration, debugging, and final project deployment.

Key Projects & Demonstrated Skills

Responsive UI Development: Built fully responsive page layouts using semantic HTML, CSS Grid/Flexbox, and React components.

AI Feature Integration: Integrated AI-assisted functionality into a web interface to enhance user interaction.

Performance Optimization: Reduced page load time through asset compression, lazy loading, and code cleanup.

Quality Assurance & Debugging: Identified and resolved UI/functional bugs through structured cross-browser testing.

Agile Collaboration: Participated in sprint planning and iterative delivery alongside the development team.

Certification & Official Verification

Verification Metric	Official Record / Credential Details
Internship Title	Frontend Developer Internship
Issuing Organization	Host Dhanraj - Digital Solutions & Creative Innovation
Program Duration	4 Weeks (12 July - 13 August 2026)
Certificate ID	HDJ-JUL0725-198 (Issued: 12 August 2026)
Candidate Roll No.	25SCS1003001428

Certificate of Internship

Thank You!

Akshat Raj

Roll No: 25SCS1003001428

**School of Computer Science &
Engineering**

IILM University, Greater Noida, U.P.
